

Billing

Add a Billing tab inside Settings.

Billing tab should include:

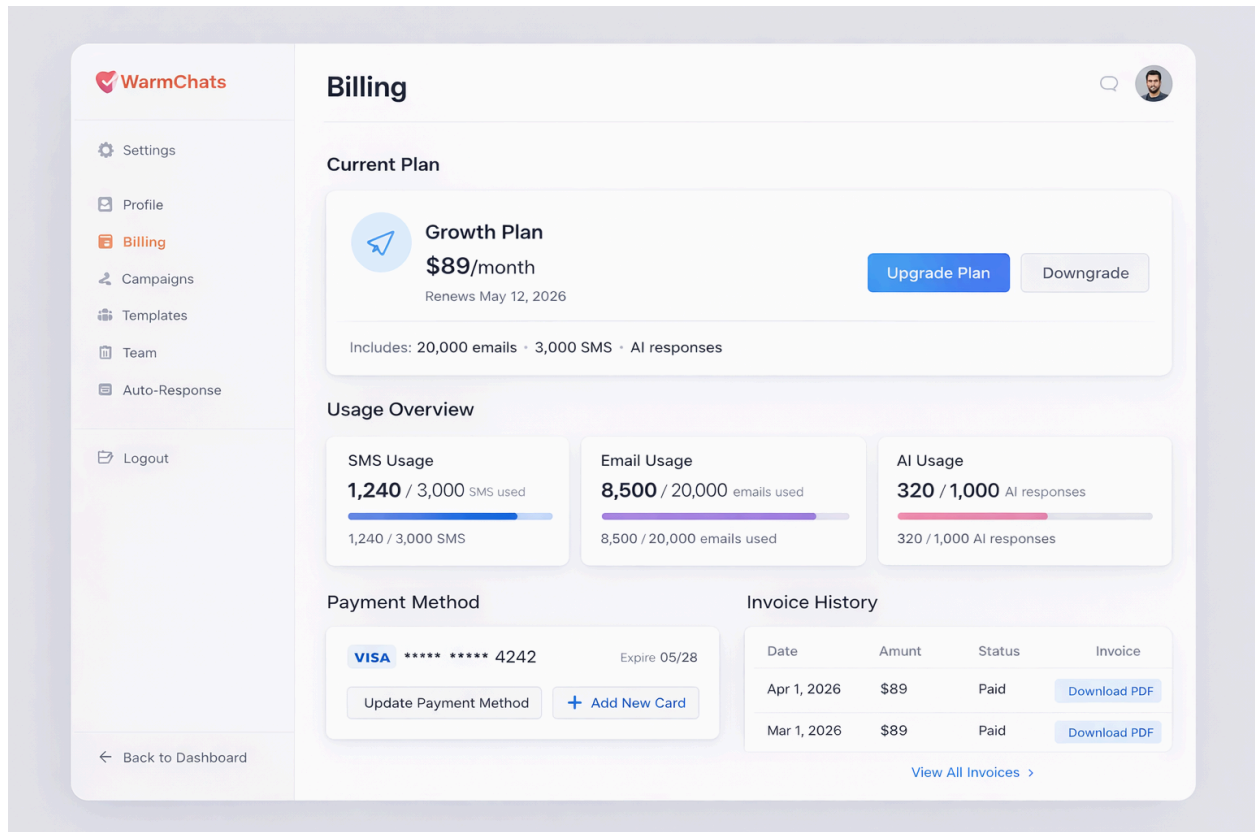

- Current plan (name, price, renewal date)
- Usage metrics (SMS, email, AI usage)
- Upgrade / downgrade options
- Payment method management
- Invoice history

Important: Billing is the main management page, but upgrade prompts should also exist throughout the app:

- AI Follow-Up Engine section
- When user hits limits
- Dashboard usage indicators

Do not rely only on Billing tab for upgrades.

Upgrade plan needs to look similar like this image same concept just Warmchats version

Billing Page must include:

- Current plan
- Usage stats (SMS, Email, AI)
- Overage breakdown
- Upgrade / downgrade options
