

Build a right-side slide-over panel for booking appointments from the Inbox. Keep it minimal and fast:

- Appointment type as button options (not dropdown)
- Date + time inline
- Meeting type toggle (In person / Phone / Google Meet.
- Optional notes field
- Toggle: Send SMS + Email confirmation

After booking:

- Add event to conversation timeline
- Update lead stage to “Appointment Booked”
- Trigger confirmation message
- Show appointment card inside thread with reschedule/cancel actions

Goal: booking should take under 10 seconds without leaving the inbox.
