

I want the WarmChats dashboard implemented like this mockup. Don't mind the side dashboard just the page inside

Main layout:

- Left sidebar fixed on desktop with logo, navigation, conversation badge, plan card, and upgrade button
- Top header with search bar, date selector, notification bell, and user profile dropdown
- Main dashboard content should be responsive and use cards/grid layout

Dashboard sections:

1. KPI cards across the top:

- Pipeline Value
- New Leads
- Replies
- Appointments
- Closings: For WarmChats MVP, closings should be tracked manually + automatically from pipeline movement.

Best/simple system:

How Closings Work

A lead becomes a “Closing” when:

- Agent manually moves lead to:
 - Closed Won
 - Closed Deal
 - Closing Complete

And

- AI/automation detects phrases like:
 - “We closed”
 - “Deal funded”
 - “We got the keys”
 - “Transaction closed”

Pipeline Stages

- New Lead
- Engaged
- Qualified
- Appointment
- Active Client
- Under Contract
- Closed Won
- Lost

Each card needs:

- Icon
- Main number
- % change vs last 30 days
- 3-dot action menu

2. Priority Actions card:

- New replies waiting
- Hot leads waiting
- Appointments need confirmation
- Leads need human follow up

Each row should have a count and action button like Take Over / Review / View.

3. Hot Leads card:

- Lead initials/avatar
- Lead name
- Lead status/intent

- Priority badge
- Last activity time
- Link to view all hot leads

4. AI Assistant card:

This is the main control center.

It should show:

- AI Active status
- Explanation text
- Buttons:
 - New Lead
 - Start AI Campaign
 - Add Leads
 - AI Conversations
 - AI Settings
 - Templates
- Bottom mini stats:
 - Conversations AI Handling
 - Hot Leads Engaged
 - Booking Intents Detected
 - Needs Human Takeover

5. Active AI Conversations:

- Tabs: All, New, In Progress, Waiting Reply, Needs Human
- Conversation rows with channel icons, status badges, preview message, and last activity time

6. Performance Overview:

- Funnel from Leads → Conversations → Appointments → Closings
- Conversion rate at bottom
- Date filter like "This Week" "this month"

7. AI Activity Today:

- Conversations Started
- Messages Sent
- Leads Qualified
- Appointments Booked
- Human Takeovers
- Button to view AI Activity Log
